OPATRA™
Advanced Skincare Technologies

INTRODUCTION

Thank you for choosing Opatra's revolutionary **DERMISONIC** skincare device.
PLEASE READ ALL INSTRUCTIONS AND ADDITIONAL INFORMATION THOROUGHLY BEFORE USE AND KEEP THIS MANUAL FOR FUTURE REFERENCE.
This product is designed for personal use in improving the appearance of your skin. The device is not intended for the use or sale for medical purposes. Please keep out of reach from children and maintain proper safety precautions whilst using the device.

The fundamental ritual for a holistic skincare regime, **DERMISONIC** is a professional-beauty device, which combines ultrasonic sound waves and effective skincare technology:
ion (galvanic current), photon (red, blue, green lights), ultrasound, and vibration massage. When used in combination with facial creams, Dermisonic improves product penetration at a deeper cellular level. The result is a solution that helps to deliver a radiant, healthy and hydrated skin complexion.
This unique and powerful technology is designed to promote cell renewal and repair by improving the skin's feel and appearance by helping with:
- Cleansing the skin at a deep cellular level
- Tightening and eliminating the appearance of fine lines and wrinkles
- Aiming to reducing fat, shape slim face contour
- Targeting skin spots and dark circles around the eye area
- Promoting blood circulation and skin metabolism
- Dermisonic is convenient to use, enabling you to care for your skin at home, in addition to being easy to carry and operate. It is suitable for all skin types.

YOUR DERMISONIC DEVICE

INSIDE THE BOX YOU WILL FIND

- Your Dermisonic Device fully charged.
- Pair of Glasses (to protect the eyes from the LED light)
- Power adapter for the machine
- Cotton Pads
- Owners Manual

PLEASE REFER TO THE IMAGES TO UNDERSTAND THE BUTTONS ON YOUR DEVICE

PLEASE NOTE:
Dermisonic buttons are very sensitive. In order to switch on your device, click it very gently.

SAFETY PRECAUTIONS

Please read following information carefully before using your machine. Whilst using the device, basic safety precautions should be followed, as listed below.

This is not an exhaustive list, but will assist in ensuring your safety and will help you maintain the lifespan of the product's warranty.

1. Store the device away from direct sunlight and humidity.
2. Do not immerse the device in water. Take care when placing the device, avoid areas where it can fall into a sink or bathtub. If the device has fallen into water, do not reach for the item and unplug immediately.
3. Never attempt to disassemble the product. All the components can be only maintained and repaired by professional technicians.
4. Do not use any other power except the original one.
5. Do not use if the device is damaged, dropped, not working properly or tampered with.
6. Do not use if you are pregnant, have a pacemaker, epileptic, heart disease history or other medical condition and severe skin conditions.
7. Keep this product out of reach from children.
8. Do not use around a wound or open sores.
9. Do not apply to the lips, eyes, eyelids and do not use on throat.
10. Dermisonic is for use on healthy skin.
11. If you repeatedly suffer from red flushes, itchiness or pyogenic inflammations, stop using Dermisonic device, and contact your dermatologist for further advice.
12. Remove all metallic devices before using Dermisonic.
13. Do not use when plug to the socket, only use on wireless mode.

IMPORTANT INFORMATION FOR USE

1. This device should only be used under normal conditions. When not in use, keep the device's power turned off and unplugged from the power source. This will prevent the device from overheating and maintaining product lifespan.

2. Dermisonic should not be used internally (such as mouth and nose, etc.) and precaution should be taken to avoid use in the throat area (avoiding thyroid stimulation), open sores, wounds or infected areas. In addition, do not use if pregnant, epileptic, have a pacemaker, heart disease history or any other medical condition.
   Please note: if you have dental implants only use the galvanic option (ion+, ion) on the lowest strentgh

3. Whilst using the ultrasound function, it is normal for the device's massage head to feel warm to touch and provide a pricking sensation to the skin. The application of skin cream prior to using the device can relieve any possible discomfort.

4. Avoid using this machine longer than the recommended 15 minute duration in one area. Move it around your skin to ensure the effects of the device's energy waves are evenly dispersed.
   To ensure the product's lifespan, maintain and clean the massage head after each use with a wet soft cloth to clean the head. Avoid using detergents or chemical cleansers to clean the product

DERMISONIC TECHNOLOGY

DERMISONIC'S 5 unique functions provide a powerful skincare solution in a single technology:

- Ultrasonic therapy increases the production of collagen, the key nutrient that ensures firmness and elasticity in your skin.
- Vibration massage (vibration of 6,000-7000 times per minute) helps accelerate blood circulation, reduce melanin and improve moisture levels. Working with Ultrasonic function, it can whiten and tighten your skin.
- Ion+ setting forms a positive electrical charge, attracting impurities and dead cells and drawing them out from the skin's pores.
  This helps treat deep cleansing and firming.
- Ion- setting forms a negative electrical charge, helping skin cream nutrients penetrate in the cellular level more effectively. This helps treat hyperpigmentation.
- LED light therapy is Dermisonic's defining anti-ageing function, which helps achieve increased collagen and a reduction in fine lines. Please refer to the section of photon care in this manual for further details.

The ion+ and ion- modes cannot be used simultaneously, but can be used together with the ultrasonic, vibration massage and LED therapy functions. The device offers pain-free therapies and is suitable for home use.

BEFORE USING DERMISONIC

1. Dermisonic comes fully charged for your convenience and should last up to 2 hours of usage.
2. The machine will need recharging when it will no longer turn on.
3. Charge the machine for 2 hours. Do not charge for longer than 2 hours, to avoid the device overheating.

PREPARE YOUR SKIN

Cleanse skin thoroughly and make sure area to be treated is dry.

APPLY SERUM OR CREAM

Use the cream according to the setting, if you use the red light use an anti ageing serum or cream, if you use the blue light, use an exfoliator or cleanser, if you use the green light, use an anti pigmentation serum or cream.

CHOOSE YOUR TREATMENT

Choose the setting you want to use – it can be one or multiple settings at the same time.

ION TREATMENT

TECHNOLOGY

Ions apply an electrical current to the skin: positive (cathode) and negative (anode) forces work to create a magnet like effect.

ION [+] This mode is designed to loosen excess oil and impurities, for a deeper cleansing when you wash. Ionizing helps fight bacteria on your skin (recommended to use with the blue light)

ION [-] Negative Ions helps deep down Infusion of nutrients from your own products directly into your skin. (recommended with the green and red light)

BENEFITS

ION technology is efficient in treating both dry skins and acne. Its benefits are numerous:

- Nourish your skin
- Clear your skin from oil, dirt and dead skin cells
- Give your muscles a workout during the massage

Please note: this function shall NOT be used if you have a pace maker, heart problems, pregnanat, or have any medical condition,do NOT use it on the eye area and the throat area.

ULTRASONIC TREATMENT

To test if the machine works properly on ultrasonic mode just apply a drop of water on top of the metal head and activate the sonic mode, you should see the water move.

TECHNOLOGY

Ultrasound sends high frequency waves, approximately 1,000,000 times a second through the skin. These waves go deep into the skin: this produces fast repeated stretching and shrinking of the cell membranes which promotes collagen production and improves skin elasticity.
The vibration of these ultrasonic waves also removes the dead skin cells that block pores, without damaging living skin cells in the lower layers of the skin.

BENEFITS

Ultrasound technology is well-known for its anti-aging properties. The following benefits are observed:
- Lift and tighten the skin by stimulating skin to create new collagen
- Remove dead skin cells
- Reduce excessive oil and cellular debris

RECOMMENDATIONS

It is recommended to use Ultrasonic treatment maximum 10 minutes a day. You can use Ultrasonic, ION and Photon functions simultaneously.

Please note: this function shall NOT be used if you have a pace maker, heart problems, pregnanat, or have any medical condition,do NOT use it on the eye area and the throat area.

PHOTON LED LIGHT THERAPY

TECHNOLOGY

Photon is an emerging therapy that uses the natural healing power of light to treat inflammation and acne.
Exposing the skin's surface to light activates the skin's photoreceptors and let the skin cells absorb its energy. It accelerates cell biochemical circulation and stimulates the production of collagen.

BENEFITS

Photon LED technology is great to help with redness and stop any inflammation thanks to the power of red light. Here are some of its benefits:
Reduce skin inflammation
- Calm rosacea down to reduce the appearance of overall redness
- Accelerate skin repair to enhance younger looking skin
- Has anti-ageing properties.

RECOMMENDATIONS

It is recommended to use Photon LED treatment maximum 15 minutes a day. You can use Ultrasonic, ION and Photon functions simultaneously.

HOW TO USE

FIRST RECOMMENDATIONS IN 3 STEPS

- Use Dermisonic only once a day, 3 times a week.
  The metal surface must be touching the skin:

- Put the facial head firmly against the skin and move slowly:

HOW TO USE Dermisonic FOR GENERAL FACE CARE

1. Along the face line from
   the bottom of the chin
2. From the chin to front of the ear
3. From the mouth to the temple
4. From under the nose to the temple

HOW TO USE DERMISONIC DIFFERENT MODES

ION TREATMENT

Press the "MODE" button and you will see on the screen "sonic" flashing, press the "MODE" button again to scroll down till you see ION+ or ION- flashing according to your choice. Press the "shift button" to choose the Strength you require for the treatment.
Once you chose your strength press "cfm" to activate the machine and click it again to stop the treatment.

ULTRASONIC TREATMENT

Press the "MODE" button and you will see on the screen "sonic" flashing, to change between the different levels of ultrasound power press the "shift" button and choose the level you require.
Once you chose your level press "cfm" to activate the machine and click it again to stop the treatment.

PHOTON LED LIGHT THERAPY

Apply the relevant cream/serum for the treatment you require.
Press the "MODE" button and you will see on the screen "sonic" flashing, keep pressing on "MODE till you see the "PHOTON" option flashing, press the "shift" button and choose the light you require, Red - Anti Ageing, Blue - Anti Bacterial, Green - Pigmentation treatment.
Once you chose your light press "cfm" to activate the machine and click it again to stop the treatment.
Hold Dermisonic with your hand, make sure that the head of the device touches the skin and move it slowly.
ALWAYS wear your protective glasses when using LED light therapy.

TIPS FOR USING DERMISONIC MASSAGER

- For optimal results use Dermisonic three times per week
- If you have sensitive skin use Dermisonic only once per week.
- Allow 5 hours between each Dermisonic treatment on the same area. Allow your skin to rest.
- If you suffer from pimples and blemishes due to oiliness, and as a result you have the appearance of large pores, use Dermisonic once per week with the ultrasound mode only.

For best results use Dermisonic at night time before going to sleep.

CLEANING DERMISONIC DEVICE

After use remove any excess products from Dermisonic with a damp cloth.
Dry thoroughly and store in a dry place.

- Dermisonic is NOT waterproof.
- Do not let water enter the device.
- Do not touch Dermisonic with wet hands.
- Do not immerse Dermisonic in water.
- Do not wash Dermisonic with water or any other liquids.

DERMISONIC TECHNICAL SPECIFICATION

Product Name	OPATRA DERMISONIC
Model N°	SC FF3382
Ultrasound Wave	3 MHz 5%
Adaptor Input power	AC 100-240V
Adaptor Output Power	5v, 0.8a
Weight	175g
Dimensions	17.8 x4.8 x 4.5cm

LIMITED ONE-YEAR WARRANTY CERTIFICATE

This product comes with a Guarantee of One year. In the event that your Dermisonic is faulty within a year of purchase:
Please return your product along with your receipt and the original guarantee certificate for us to repair it for you.
